DO MORE, STRESS LESS: UNLOCK COMPLETE NETWORK VISIBILITY FOR SMALL AND MEDIUM-SIZED ENTERPRISES (SMEs)

Amplify Efficiency without Adding Complexity or Staff

CHALLENGES

Most SMEs are dealing with:

- Overstretched IT teams juggling too many tasks
- Growing network complexity, limited expertise
- Constant firefighting across disconnected systems
- Tight budgets, little room for error

Consequences

- High burnout and turnover, driving talent loss
- Rising frustration and declining productivity

And this is further complicated by a lack of centralized network device visibility, which leads to:

- An increasing number of connected devices—traditional IT devices, IoT and OT—across headquarters, branch offices, remote users and cloud deployments—creating blind spots
- Manual processes from outdated systems causing costly downtime
- Complexity from cloud and legacy integrations, like mergers and acquisitions, draining resources

Consequences

- Increased operational costs (time and resources)
- Costly errors and downtime/outages due to IP address misconfigurations, manual updates and patches
- Increased vulnerability to cyberthreats

THE INFOBLOX VISIBILITY SOLUTION

Real-Time Network Visibility
Easily see and manage all connected devices to keep your business running smoothly.

Unified View Across Hybrid Environments
Get full visibility across on-premises, cloud and remote networks for consistent monitoring and policy enforcement.

Faster Threat Resolution
Enrich security alerts with device identity, location and behavior data for faster and more accurate responses.

Instant Insights, Simple Interface
Simplify network management with an intuitive interface that offers actionable insights for all IT skill levels.

Less Manual Work, Fewer Errors
Automate DNS/DHCP, IP address assignments and device onboarding to reduce errors and free up IT resources.

Maximize Value of Your Current Tools
Integrate seamlessly with existing tools via APIs to automate workflows and boost efficiency.

WHAT SMEs GAIN WITH INFOBLOX VISIBILITY

Implementing network visibility isn't just about seeing more—it's about doing more with less. Here's what SMEs can expect when they adopt a visibility-first approach with Infoblox:

NEED	BENEFIT FROM INFOBLOX[1]
Reliability and Uptime	**15%** more uptime, fewer costly outages
Faster Troubleshooting	Save **600 hours** resolving issues faster
Streamline Operations	**70%** less manual network management tasks
Scalable Growth	Deployments **in hours, not weeks**
Stronger Compliance	Instant **audit-ready asset** records
