

10 REASONS WHY YOU NEED BLOXONE™ THREAT DEFENSE NOW

- 1 Enhance visibility**—Get rich network context including IPAM and asset metadata about your network devices for clearer correlation of events.
- 2 Protect everywhere**—Secure existing networks and your digital transformations, such as cloud, IoT and SD-WAN, using the foundational infrastructure you already have.
- 3 Block advanced threats**—Detect and block malware, ransomware, phishing, exploit kits, DNS-based data exfiltration, DGA, DNSMessenger, fast-flux attacks and more, using highly accurate threat intelligence and analytics-based on machine learning.
- 4 Leverage hybrid security**—Detect threats and block on or off premises to protect headquarters, data centers, branch locations, remote offices and roaming devices.
- 5 Accelerate threat investigation**—Automatically apply threat data from dozens of sources for faster investigation, increasing analyst effectiveness by 3x.
- 6 Automate incident response**—Reduce time to remediation by up to two-thirds by leveraging two-way data sharing and security ecosystem integrations.
- 7 Empower SOAR**—Leverage rich contextual network data to empower SOAR platforms and easily extend integration to other security tools.
- 8 Boost operational efficiency**—Reduce the number of alerts to review and the noise from your firewalls.
- 9 Unify security policy enforcement**—Improve overall security posture by leveraging aggregated, accurate threat intelligence data across your entire security stack.
- 10 Improve ROI**—Get more value from your existing investments and make your security stack more effective and efficient.
